

# MAGGIE BRUMMEL

EXPERT CONSULTANT

## Summary

Maggie is a skilled laboratory professional with 14 years of expertise in clinical settings, encompassing 8 years of leadership roles specifically focused on core laboratory operations. Her responsibilities have ranged from overseeing single to multi-site testing facilities in hospital and health center environments, including outpatient and ambulatory settings. Notably, her most recent role involves managing anatomic pathology operations.

Maggie possesses a wealth of experience in project management, implementing test systems, and designing laboratory layouts. She is well-versed in change management, laboratory information systems (LIS), and technical operations, demonstrating adeptness in facilitating organizational communications crucial for successful project implementations.

Driven by a commitment to quality, Maggie fosters a culture of innovation and process enhancement, encouraging fellow leaders to challenge existing practices. She has successfully introduced improvements to quality control systems, such as implementing Individualized Quality Control Plans (IQCP) and defining chemistry standard deviations.

Maggie has served as a Clinical Laboratory Improvement Amendments (CLIA) director for moderate complexity labs, navigating accreditation processes and inspections by organizations like the College of American Pathologists (CAP). Her experience includes overseeing plan-of-correction initiatives, conducting mock inspections, and preparing labs for accreditation inspections.

## Highlights

- Test system/assay implementation
- Staffing models, scheduling, and workflow efficiency
- Process and quality improvement incentives
- Epic Beaker Laboratory Information System optimization
- Team engagement and new hire onboarding
